The disappearance of the money box caused some of our more liberal plans and, while our work must of necessity be confined to the limited sphere which our means require, have circumnavigated about us, yet we hope that the perseverance, energy and public sympathy and support, which have ever attended our progress, will eventually surmount the obstacles in the way to greater usefulness and popularity.

"This loving treatment of the sick," he said, "is characteristic of the nations who have heard and heeded the gospel of the cross. The untutored savage leaves the young and aged to die of illness, uncared for. In the central part of the Dark Continent disease is an indication of being possessed by a devil and the sufferer is shunned. In India, the Hindoo believes that to touch a sick person is to lose caste. There are Hindoo hospitals in India, but not for human beings. They are for monkeys and other animals supposed to be the abiding places of departed souls."

IT IS A PRIVILEGE.

"In lands where the cross is planted it is not regarded as a duty, but a privilege to care for the sick and suffering.

"There is no doubt but that this institution makes great demands upon those administering. It demands precision; it demands sympathy; it demands that you must not only expend your property, but yourself.

"But this should not deter us. The cost should only spur us on to greater endeavor. Where demands are great, the yields are great. Large sowing means large harvests. The harvest that you glean in your noble work is an enlargement of your sphere of usefulness; the enlargement of your vision and wisdom; the enlargement of your sympathies. It is an education, a development, a growth—a growth in mind, heart and soul.

"You cannot experience this growth without being the instrument for it. You will be made ready for greater responsibilities for larger administrations.

"Our outpatient, or dispensary department, extends treatment to 650 patients, of whom we are gratified and fifty-six partially paid and 120 prescriptions were paid up. Among the patients of this department were 187 school children who received vaccination. Our physician also made frequent visits to the home of our patients.
